On Tuesday night about 11 o'clock in the western sky, (a little north of west), could have been observed a flame of fire that was surely phenomenal. The unnatural brilliancy of the flame attracted our attention on stepping from the house of a friend, and puzzled as some to understand what it was. It was not an aurora borealis, as there was but a single streak of it, and it was in the west instead of the north. When we first observed it, it extended from the horizon to the zenish in one straight mass, and was very brilliant. In a little while it changed its shape and appeared in the shape of an hour the ends at the horizon and zenith ap-pearing very broad. It again changed shape in a very short time, and exactly reversed itself, with the points to the horizon and zenth, and the center very being a brilliant ball like on a comet was no brighter than the rest. It was visible for more than an hour after we first discovered it, and was observed by several persons who can wouch for the truth of our assertion.— After watching it for some time it died

I have been a great sufferer from hay fever for 15 years, and have tried various things without doing any good. I read of the many wondrous cures of Ely's Cream Balm and thought I would try once more. In fifteen minutes after one application I was wonderfully helped. ERIE, KAN., July 27 .- The arguments in the Sells case were concluded to-day.

J. P. Woods, the boy's guardian, and
J. W. Cogswell spoke for the defense. The former, who has stood by the boy almost like a father through the trial, made an earnest plea for him. J. Q. Strattom summed up the case for the State in a five hours' epeech, after which the case was submitted to the ury. In one hour and two minutes the jury came in with a verdict of mur-der in the first degree, as charged in the complaint. The prisoner accepted the verdict as a matter of fact, and was re-turned to the jail to await the result of a motion for a new trial, which will be made immediately.
